

Sharks fans get exclusive local radio coverage during all games. Our flagship station is KFOX 98.5 (SJ) and a real-time feed inside SAP Center at 102.1 FM. Listen on Sharks app/KFOX app, or find affiliate stations here: [www.sjsharks.com/radio](http://www.sjsharks.com/radio)

## How To Synch the Sharks Radio Feed with your TV

### Internet Stream/Mobile Device

If you connect your stereo speakers to the internet stream on a computer or on a mobile device using [sjsharks.com](http://sjsharks.com), [kfox.com](http://kfox.com), the KFOX app, the Sharks app, TuneIn Radio, etc., the internet radio stream is normally about 30 seconds behind the action you see on TV. Using your DVR/app, you can pause the live TV or pause the radio until TV synchs up with the radio feed.

### Listening on Standard Radio

If you are listening to the game on a regular radio, it is likely that you'll hear what happens on the ice before you see it on TV. Switch between standard definition and HD-TV feed to see which is closer. There are several methods of delaying the radio, including a product available at [www.sportssyncradio.com](http://www.sportssyncradio.com). Another way is through freeware from [www.daansystems.com/radiodelay/](http://www.daansystems.com/radiodelay/).

Dan Rusanowsky & Bret Hedican

### Fin Fact

Dan and Bret both began their careers in college hockey. Dan called the play-by-play at St. Lawrence University, and Bret played defense at St. Cloud State. Hedi's #24 was retired by his alma mater in 2010.
